INTRODUCTION

This Site Inspection Report has been reviewed by FIT with regard to EPA format and content guidelines presented in Preliminary Assessment and Site Inspection Reference Manual, prepared by Ecology and Environment, Inc. in June 1986. The reviewers comments are broken down into general, technical and evaluation sections.

In general, the Site Inspection Report was well written. The report follows the proper format and demonstrates that the author has a good working knowledge of the Hazard Ranking System (HRS).

GENERAL SERVICES ADMINISTRATION

See there are no other reports in file - LOAN

A copy of the Torrance 7.5 minute quadrangle could be used to show site location, with an arrow, or some other kind of marker, pointing out the site. A facility diagram (blueprint) can often be obtained from the facility operator, and reduced to letter size for use as the facility map.

TECHNICAL (HRS) COMMENTS

EVALUATION OF RECOMMENDATIONS

- o lack of surface water targets;
- o low net precipitation;
- o no sensitive environments exist within 2 miles of the site;
- o low permeability of the unsaturated zone; and
- o low waste quantity.
